

Fahad Zakir — Full-Stack AI Engineer

Email - fahadzakir11@gmail.com

Website - <https://www.fahadzakir.com>

Aurora, IL (407) 446-9070 US Citizen

GitHub - <https://github.com/fahad-zakir>

Skills

- **Front-End:**
- React, Next.js Redux, Saga, JavaScript, jQuery, HTML, CSS, JSP, TanStack
- **Testing:**
- Jest, Enzyme
- **Back-End:**
- Python, Node.js, Nest.js, MongoDB, SQL, PHP, NoSQL, or MongoDB, Azure Open AI Cloud, AWS, BigQuery
- **Others:**
- TypeScript, LLM, NLP, ML, Git, LangChain, LangGraph, RAG, Twilio

I build full-stack AI products that actually ship. I'm a Full-Stack AI Engineer & Prompt Engineer. I solve complex business problems by shipping complete solutions, from LLM evaluation and prompt engineering to full-stack development (React, Node.js, Python, AWS, Azure). I work fast. I communicate clearly. I get the job done.

Experience

JULY 2021 - CURRENT

Full-Stack AI Engineer- Z Full-Stack AI Solutions

LLM Model Evaluation & Prompt Engineering for Meta

Z Full-Stack AI Solutions • 2025 - 2026

- Trained and tested LLM models for Meta, evaluating prompt responses and model performance across multiple deployments.
- Ensured compliance with safety guidelines, prevented sensitive content, and optimized model accuracy using rubrics and documentation frameworks.

AI Chatbot Suite (Azure OpenAI)

Z Full-Stack AI Solutions • 2024

- Trained and tested LLM models for Meta, evaluating prompt responses and model performance across multiple deployments.
- Ensured compliance with safety guidelines, prevented sensitive content, and optimized model accuracy using rubrics and documentation frameworks.

Voice-Activated Appointment Scheduler (Twilio + Python + React)

Z Full-Stack AI Solutions • 2024

- Built appointment scheduling system that allows clients to book services via phone call using Twilio integration.
- Full-stack delivery: Python backend, React frontend, automated scheduling logic, and voice interaction flow.

SaaS Cloud AI Management Dashboard (React + AWS)

Z Full-Stack AI Solutions • 2024

- Created real-time business intelligence platform using React and AWS. Displays KPIs, analytics, and business metrics with responsive UI, error handling, and data visualization for SaaS clients.

React Component & Frontend Architecture (Northern Trust)

Z Full-Stack AI Solutions • 2022

- Developed modern React components using hooks, class components, Redux state management, and Saga middleware. Implemented Jest/Enzyme unit testing, API integrations, loading states, and data filtration for enterprise financial platform.

ARDA Award-Winning Points System Platform (Marriott Vacations)

Z Full-Stack AI Solutions • 2021 - 2022

- Built end-to-end points management system from concept to production.
- Implemented full CRUD functionality, 100% W3C accessibility compliance, and dynamic UI elements.
- Won 1st place ARDA 2022 award.

Web Development & CMS Optimization

Z Full-Stack AI Solutions • 2021

- Personalized HTML, CSS, JavaScript for client CMS websites.
- Optimized site performance, updated plugins, and debugged daily deployments.

MAR 2019 - FEB 2020

Web Developer / CompuSystems, Downers Grove, IL

- Worked on clients trade exhibitor JSP pages, used JavaScript, jQuery for the UI user forms.
- Troubleshoot email errors, usernames, and passwords issues; adjusted SQL database when needed.
- Worked with mockups for UI and features and business rules for prices and discounts.
- Set up registration forms, payment forms, and the payment processor.

AUG 2018 - DEC 2018

(PHOTON-INFOTECH)

Software Engineer / Walgreens Boots Alliance, Deerfield, IL

- Worked on a microservices project for converting an existing Angular code base to jQuery and React with Springboot (Java) back-end.
- Started with testing for React code style guide implementation using SonarQube.
- Used jQuery AJAX API call to get data and show user activity logs.

Education

College of DuPage / Lewis University - Software Development Degree - Current

General Assembly (Coding Bootcamp) - Software Engineering Immersive Certificate 2018
